

TIER ONE SURVEILLANCE

360° SAFETY, DELIVERED TO YOUR DOOR

TIER1

”

Tier One Surveillance is a trailblazing security provider harnessing advanced artificial intelligence to deliver proactive, cost-effective protection for businesses, industrial sites, and communities. Our mission is to prevent crime and ensure safety through 24/7 virtual officer monitoring with AI-powered cameras, rapid virtual guard dispatching, and mobile surveillance trailers equipped with high-resolution sensors for flexible, on-demand security. Partner with us for intelligent, reliable protection that redefines safety standards.

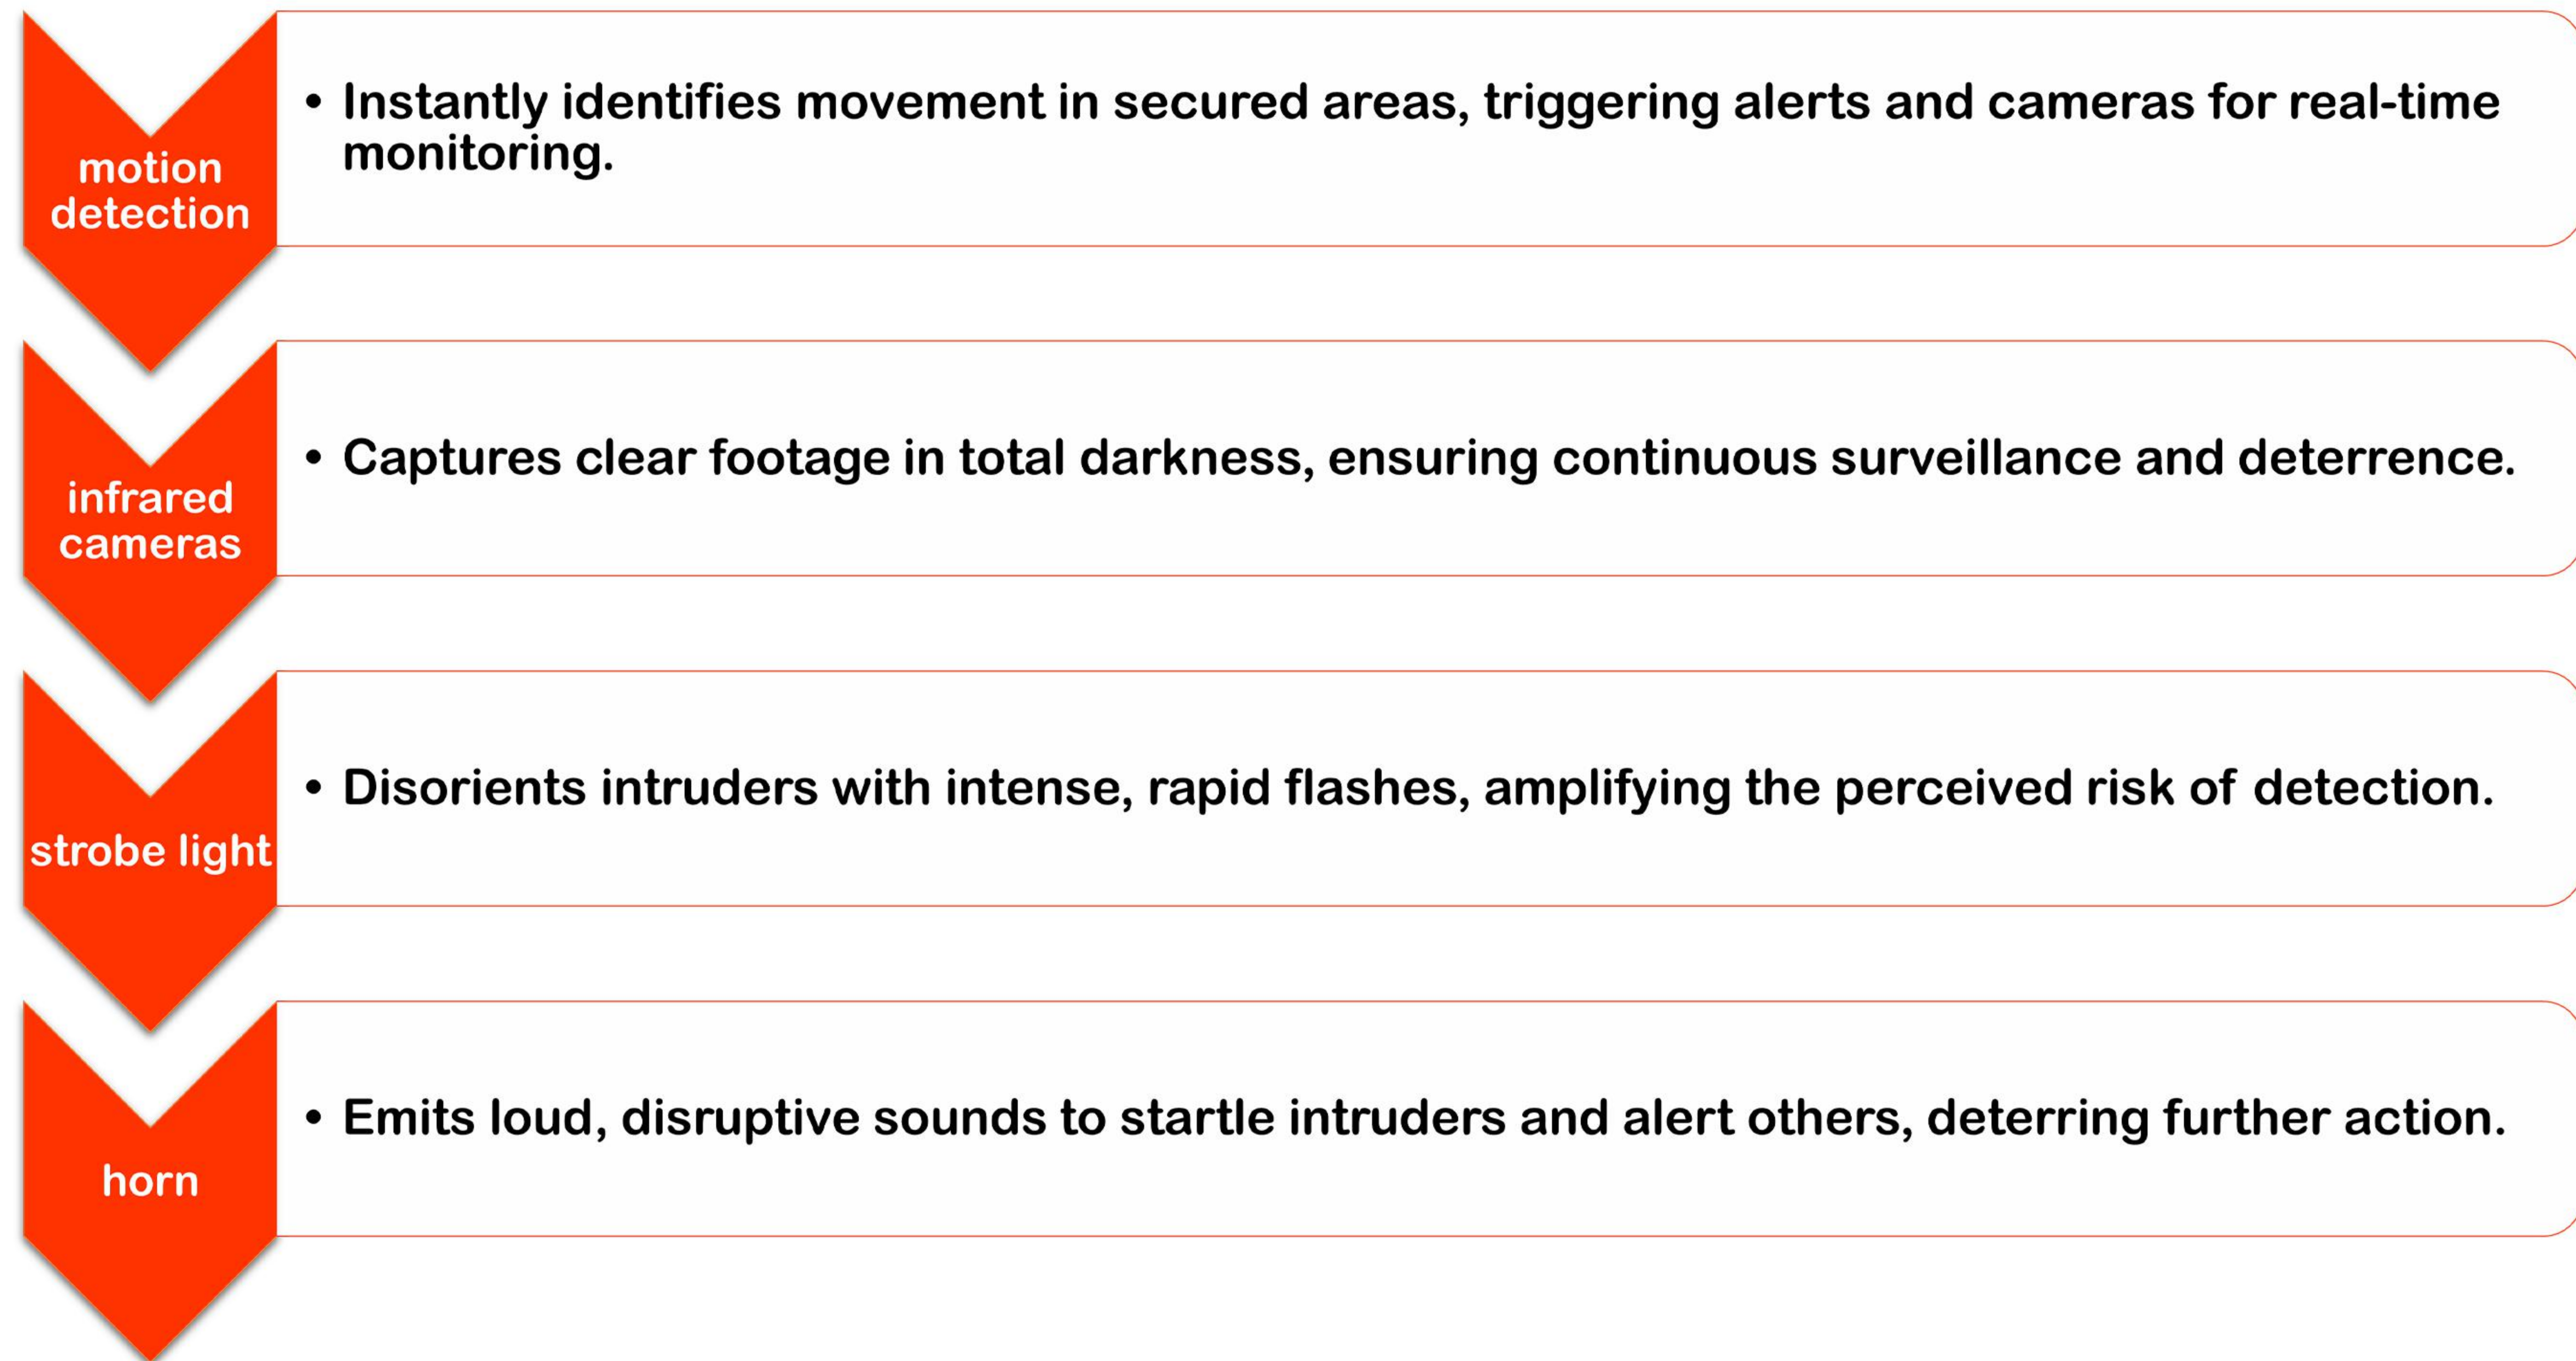

Take Control of Rising Security Costs with Mobile Surveillance

Motion Detection and Infrared Cameras as Deterrents

Motion detection and infrared cameras create a robust security barrier, often outperforming traditional guards. Motion sensors instantly detect movement, triggering alerts and activating infrared cameras to capture clear footage in total darkness. These systems work tirelessly, ensuring constant vigilance and deterring intruders by signaling active monitoring.

Strobe Lights and Horns as Active Deterrents

Strobe lights and horns enhance deterrence with immediate, intense responses that surpass a guard's impact. Bright, disorienting strobe flashes and loud horns disrupt intruders, exposing their presence and prompting retreat. These automated systems activate instantly, offering a powerful, cost-effective alternative to human security.

Tier One Surveillance in Action: A Smarter Approach to Crime Prevention

motion detection

- Instantly identifies movement in secured areas, triggering alerts and cameras for real-time monitoring.

infrared cameras

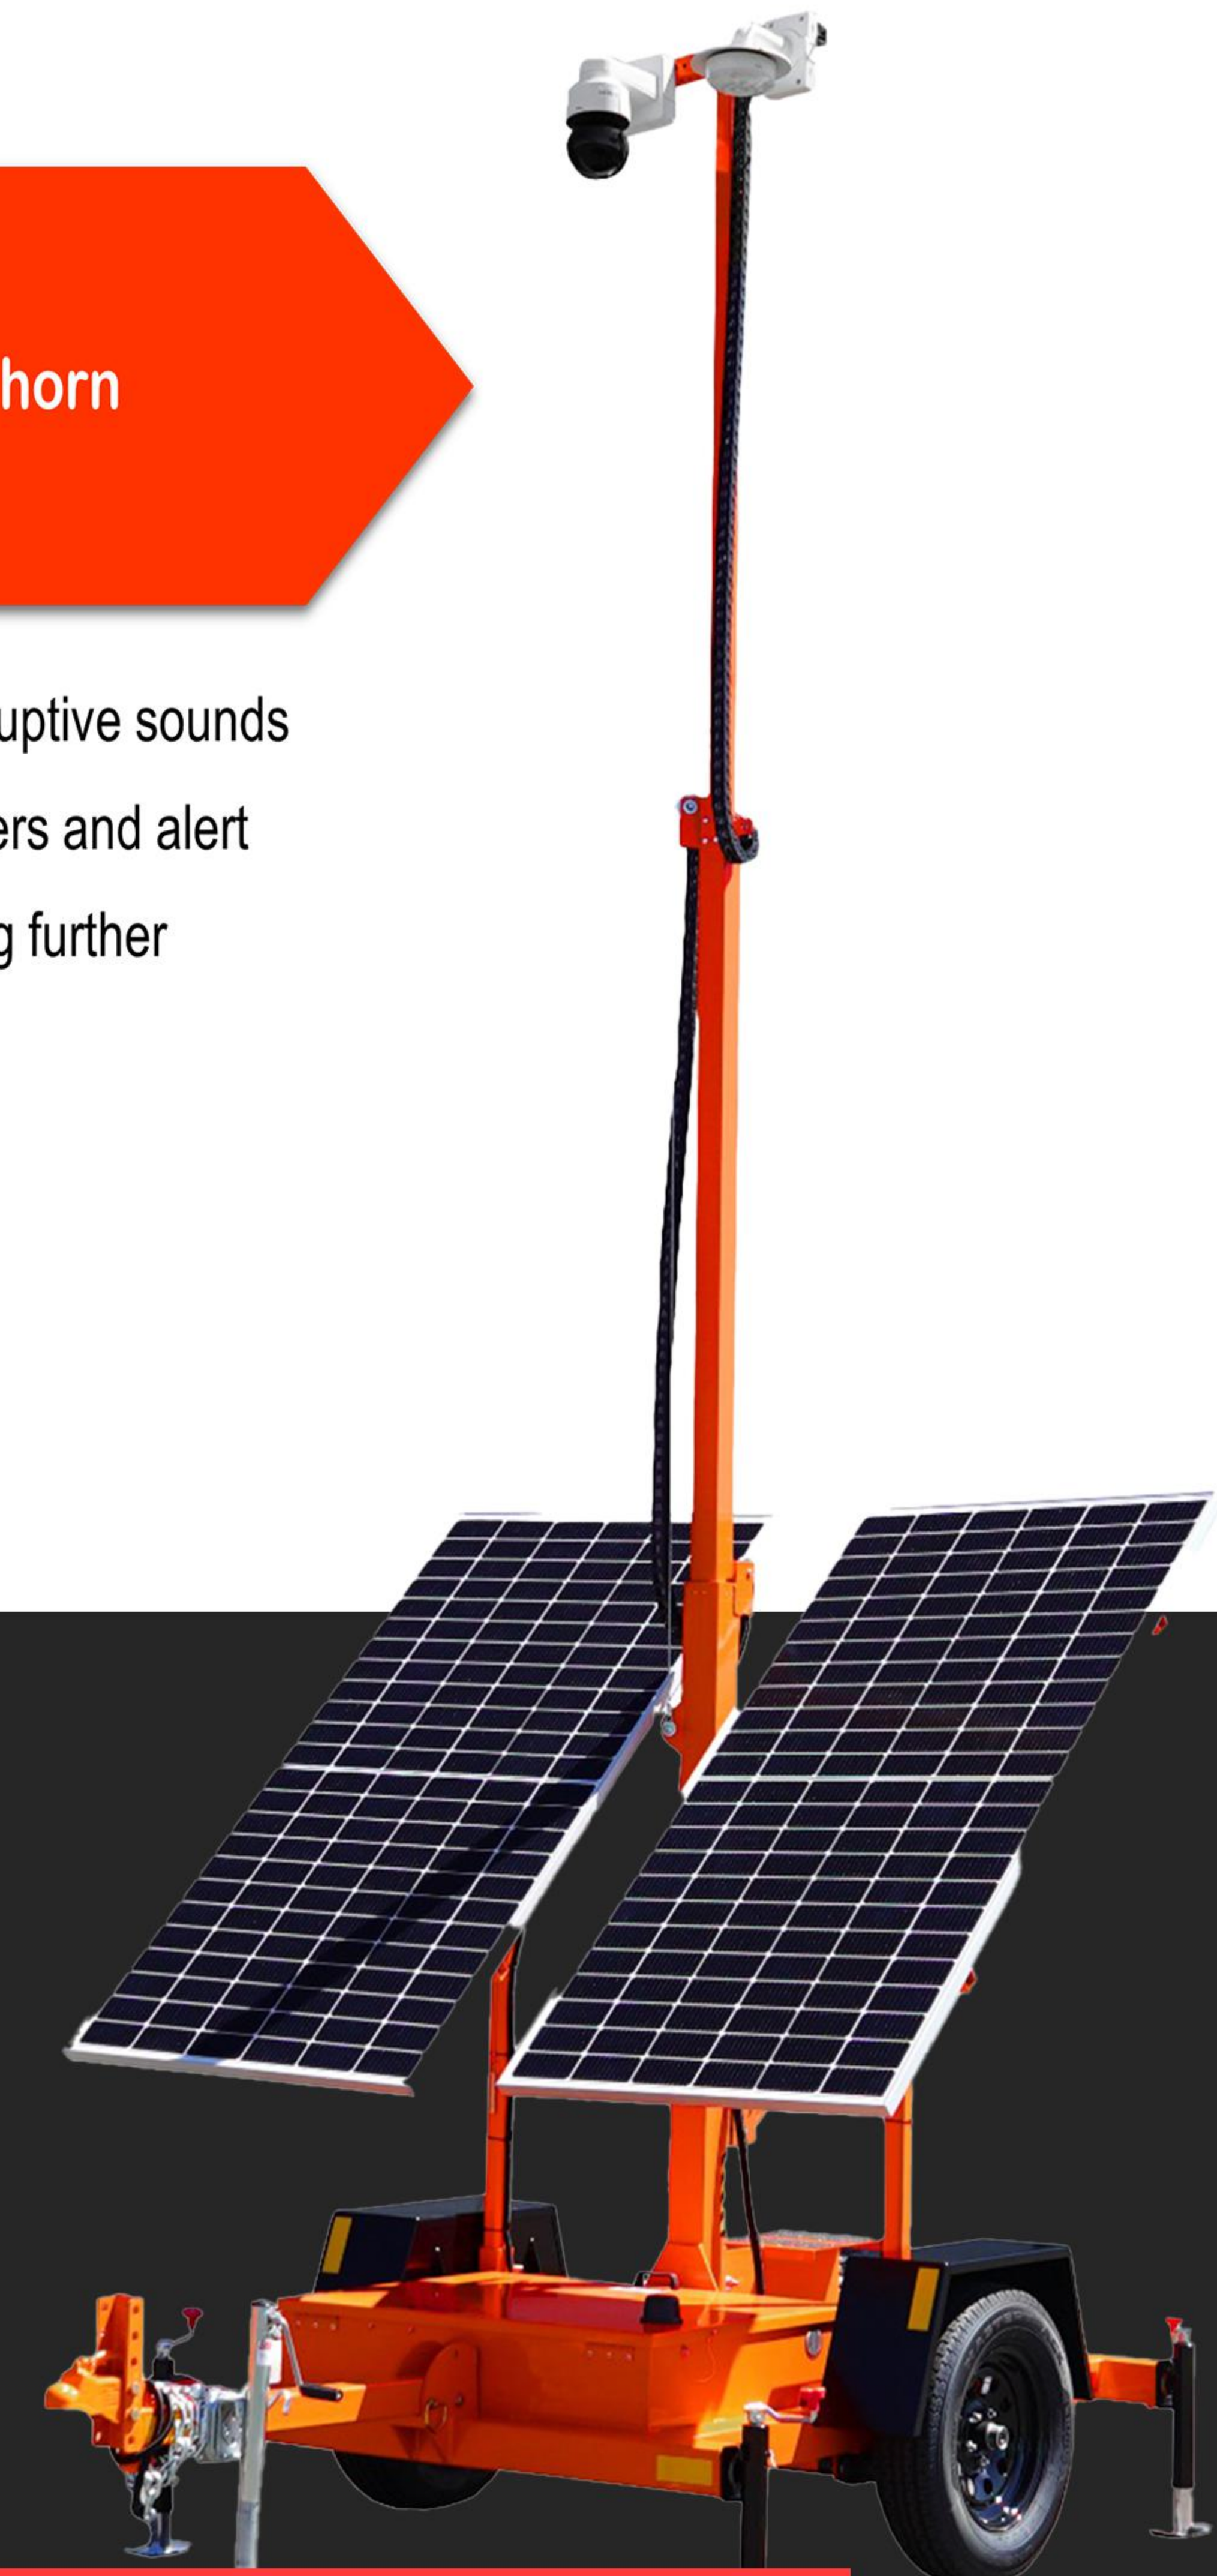

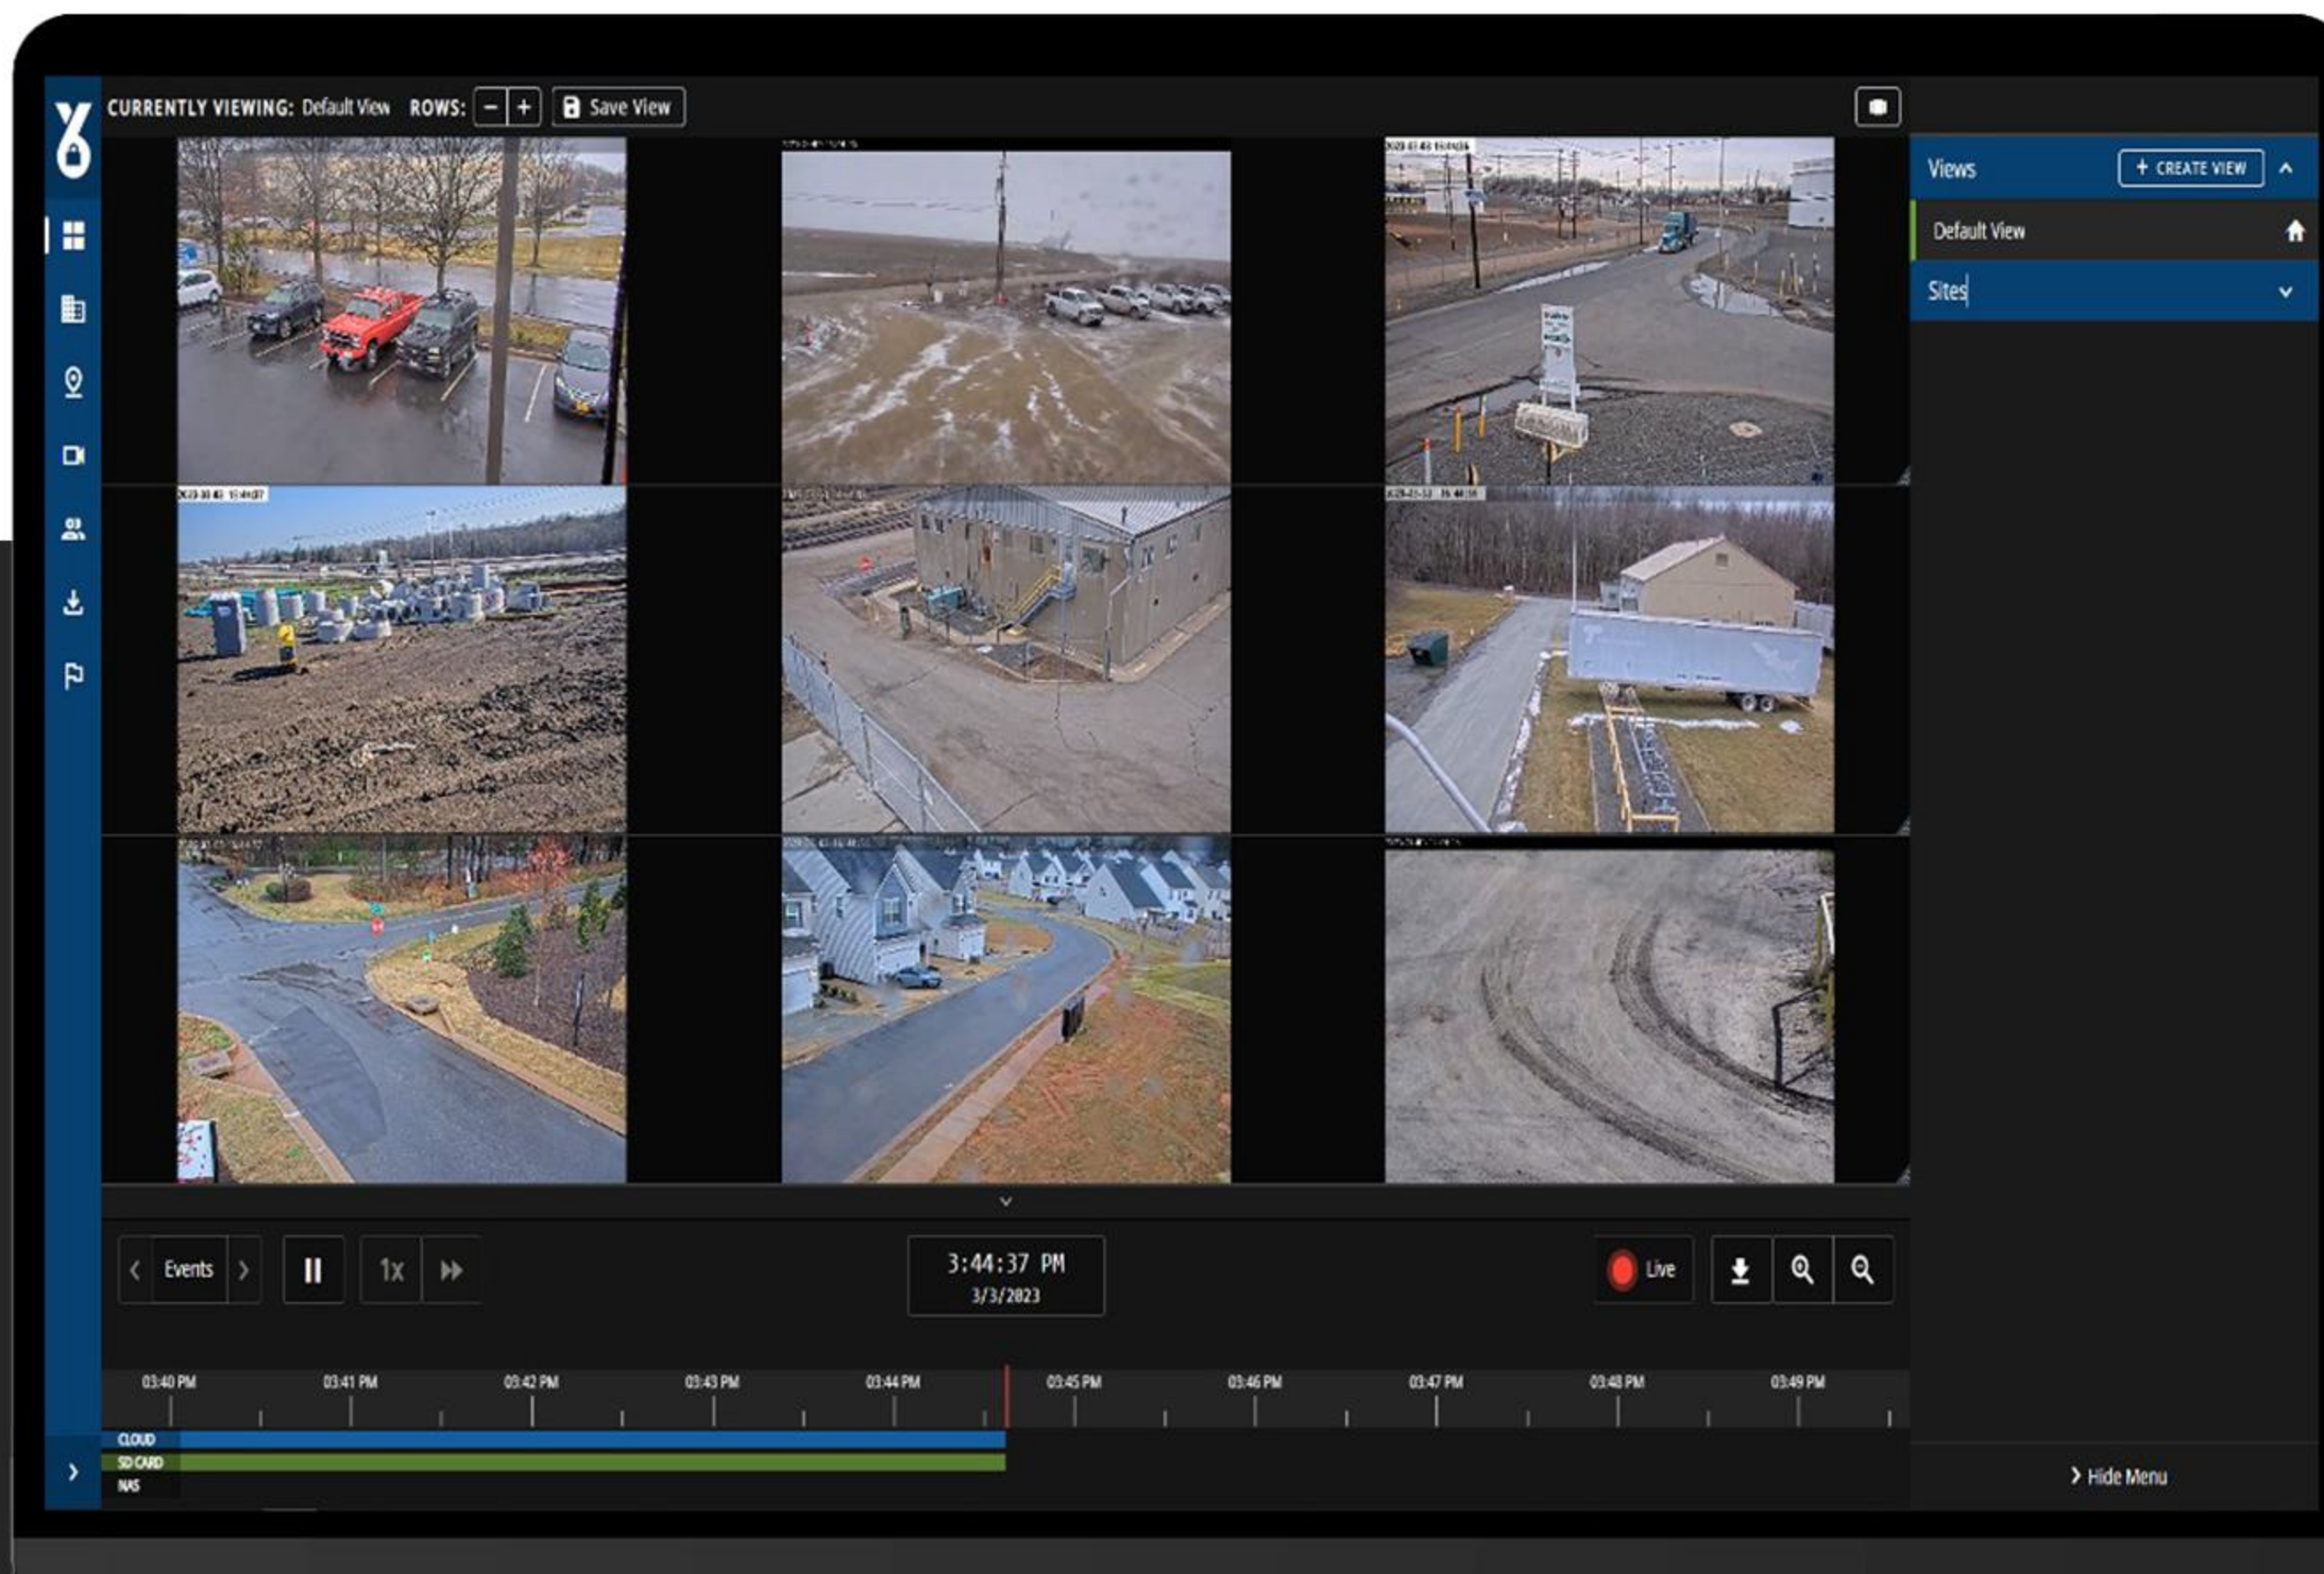

- Captures clear footage in total darkness, ensuring continuous surveillance and deterrence.

strobe light

- Disorients intruders with intense, rapid flashes, amplifying the perceived risk of detection.

horn

- Emits loud, disruptive sounds to startle intruders and alert others, deterring further action.

Tier One Surveillance Hardware

Our solar-powered security systems, backed by 24/7 virtual officer monitoring, deliver unmatched protection for any site, especially remote locations without power. Equipped with HD cameras, infrared, motion sensors, strobe lights, and horns, our mobile trailers ensure constant vigilance. Solar panels provide sustainable power, making them ideal for off-grid areas, while our Security Operations Center uses AI analytics for instant threat detection and response, outshining traditional guards.

Key Features

- Solar-Powered Cameras: HD footage, grid-free operation.
- Infrared Night Vision: Clear visuals in total darkness.
- Motion Detection: Instant alerts for precise monitoring.
- Strobe Lights & Horns: Disruptive deterrence for intruders.
- Flexible, portable security deployment.
- 7/24 Monitoring: AI and virtual officers ensure rapid response.
- Cellular Connectivity: No Wi-Fi needed for remote sites.
- Backup Battery: Powers system during low sunlight.

Tier One Surveillance Dispatch Center

Our state-of-the-art Dispatch Center operates 24/7, combining AI-driven analytics with virtual officers to monitor sites, deliver real-time suspect talk-downs, and coordinate rapid police dispatching. Using advanced AI, we issue live audio warnings to deter intruders, while our team logs detailed police reports for swift law enforcement response. This seamless integration of technology and human oversight ensures unmatched security, surpassing traditional guard services.

Key Features

- **All Day Monitoring:** Continuous AI and human surveillance for instant threat detection.
- **AI Talk-Down:** Live audio warnings deter suspects in real time.
- **Police Dispatching:** Rapid coordination with law enforcement for quick response.
- **Police Report Logging:** Detailed incident reports for efficient follow-up.
- **AI Analytics:** Identifies threats with precision, reducing false alarms.

Tier One Surveillance 24 hour Dispatch Center

Tier One Security Surveillance operates a 24-hour dispatch center staffed by a dedicated team of tier one surveillance experts. This team continuously monitors surveillance feeds, ensuring constant vigilance. They actively engage with potential deviants or criminals through the equipment, using real-time communication as an effective deterrent to prevent incidents. When necessary, the team immediately dispatches law enforcement to the location to address critical situations promptly.

Tier One Surveillance Unit

The A.I. Security Surveillance Unit is the core of our advanced security system, integrating high-performance cameras, lights, speakers, and sensors, all backed by 24/7 live monitoring from our Dispatch Center. Our cameras, featuring low-light full-color imaging, thermal, and bispectral options, deliver crystal-clear visuals in any condition, ensuring no detail is missed. Paired with AI-driven analytics and virtual officer oversight, the unit provides real-time threat detection and suspect talk-downs, offering superior protection for any site.

What makes Tier One Surveillance Different?

01

Reliability

Industry-Leading Uptime

Tier One Surveillance units are engineered for minimal power consumption, ensuring unmatched reliability. No mobile surveillance unit on the market matches our uptime standards. We define a unit as operational only when all components function optimally.

Self-Maintaining Technology

Tier One Surveillance units detect operational issues and autonomously initiate corrective measures to maintain performance.

02

Data Security

Secure Cellular-to-Cloud Connectivity

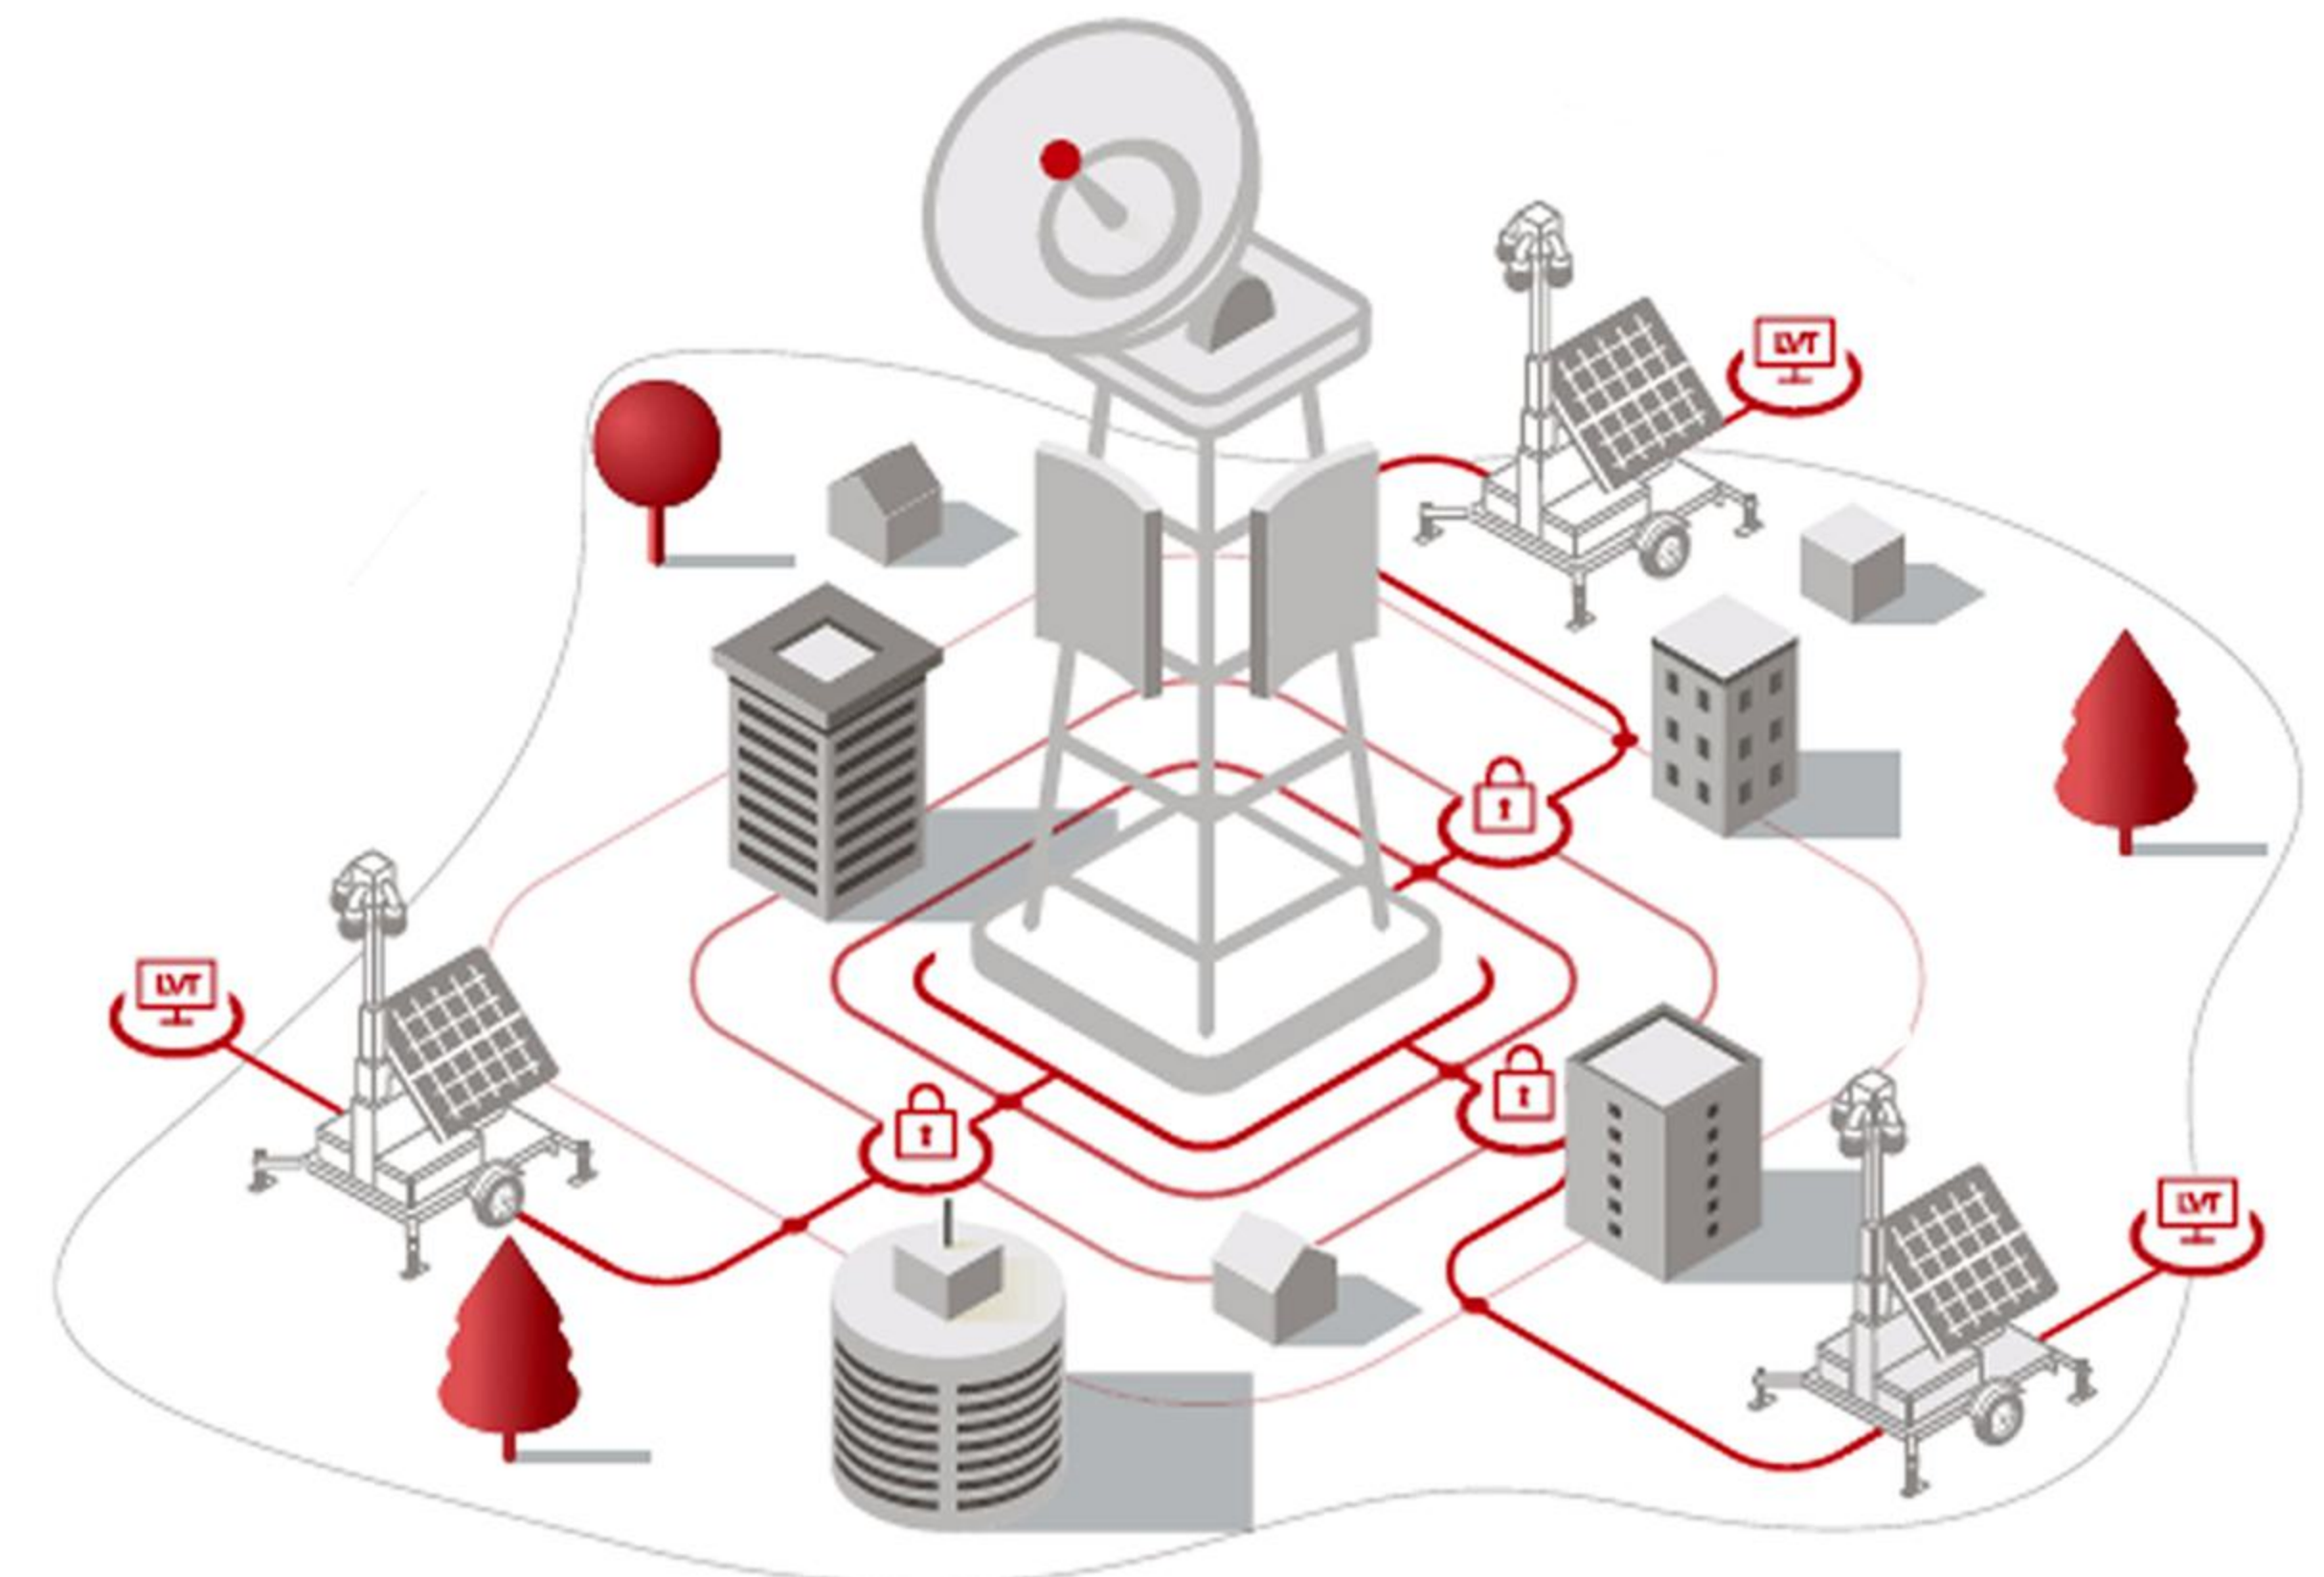

Tier One Surveillance is the only provider with a proprietary cellular network, ensuring your data remains isolated from public networks.

Proprietary Software

Our in-house developed software restricts integrations to secure APIs, minimizing vulnerabilities. Your data stays within our protected ecosystem unless you choose to download footage.

Access Governance

Tier One Surveillance empowers you to manage access, controlling which features and data your team can utilize.

03 Scalability

Mass Fleet Deployment

Tier One Surveillance units are manufactured in the USA using domestic and global components, with a production capacity exceeding 60 units per day.

Fleet Management at Scale

Our enterprise-grade software enables seamless remote access, management, and mass updates for any number of units.

National Technician Network

Our extensive network of certified technicians ensures maintenance and repairs can often begin within hours, not weeks.

04 Connectivity

The Tier One Surveillance Advantage

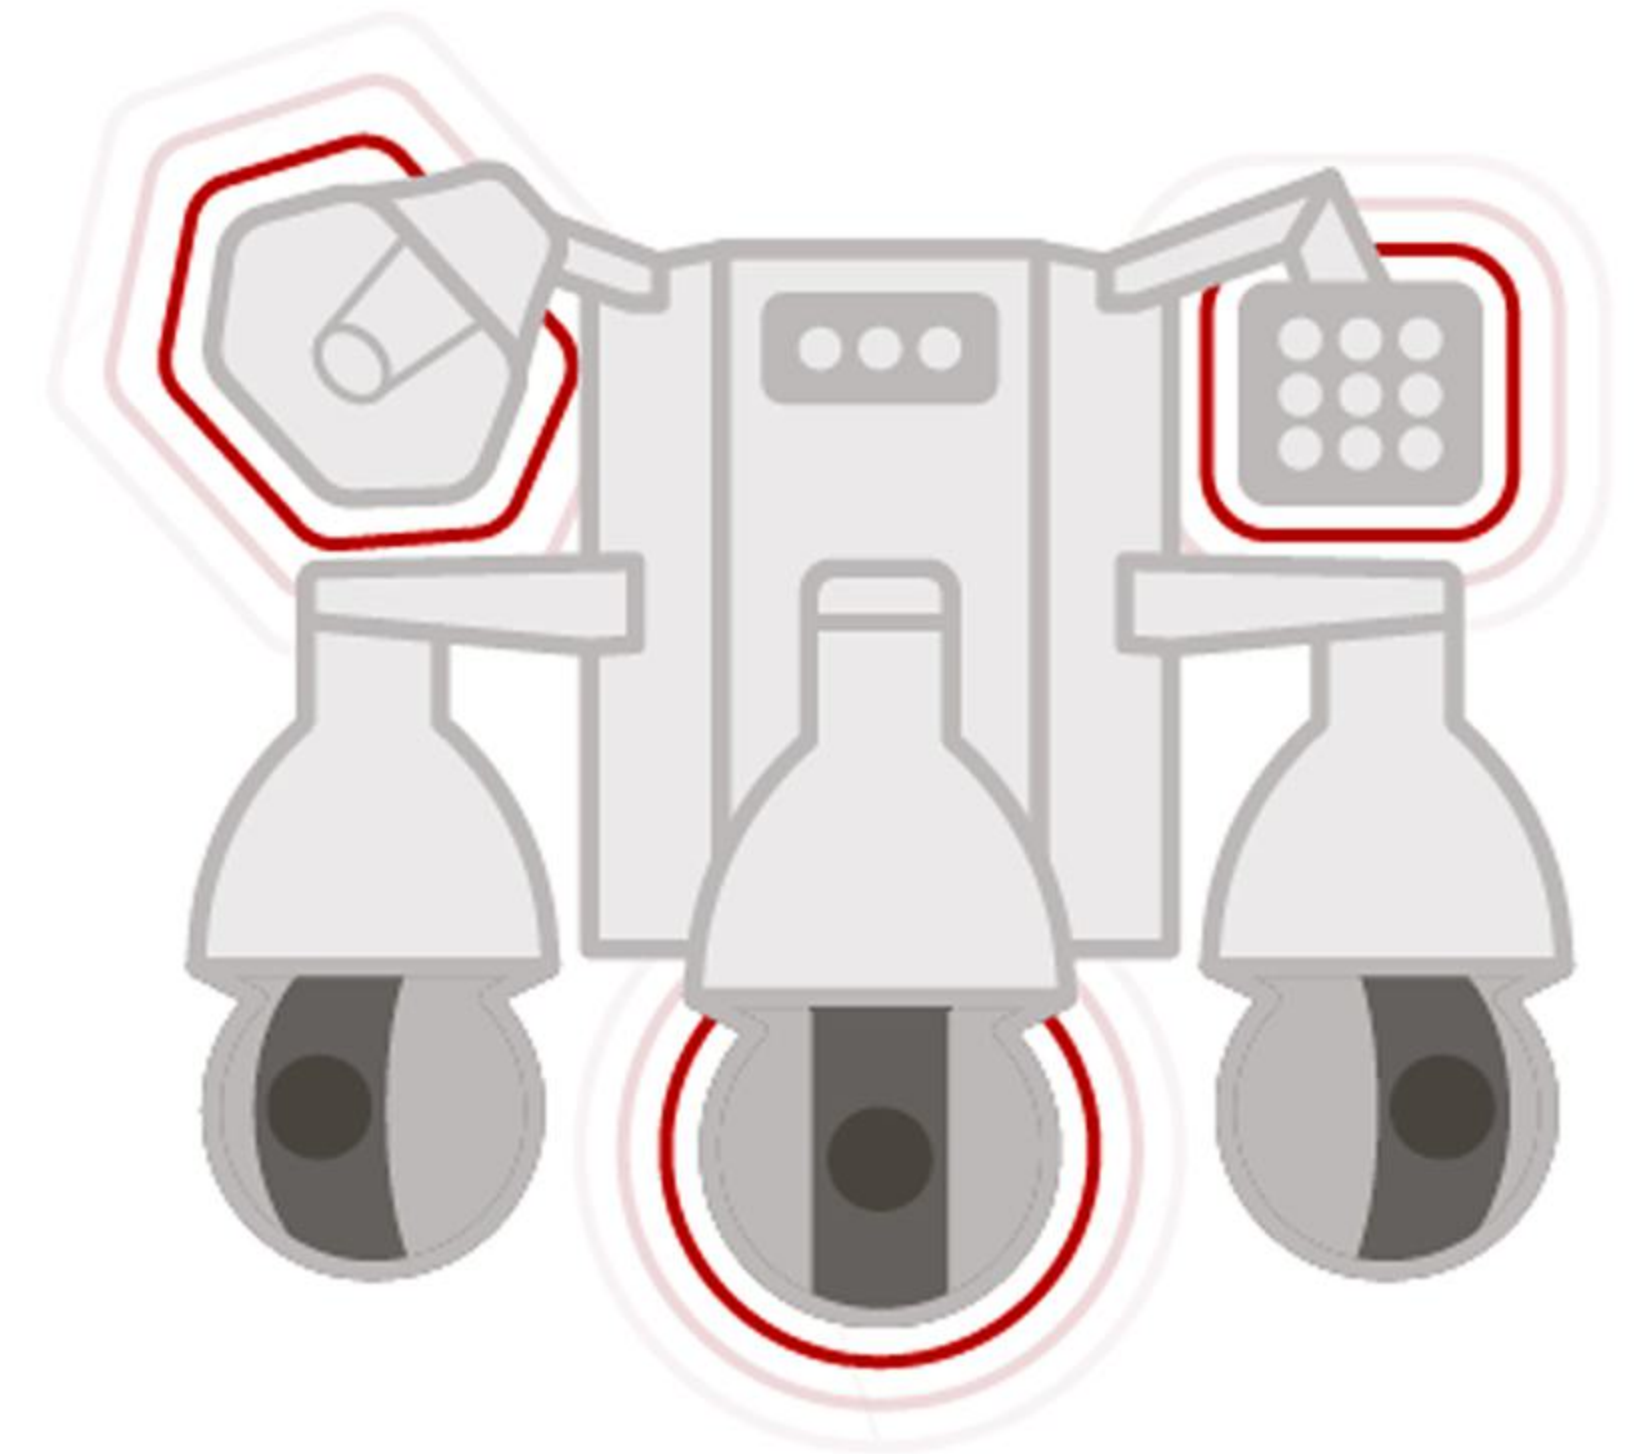

Tier One units are engineered to use significantly less cellular data than competitors, backed by patented technology.

Data Included

Your Tier One Surveillance subscription includes data, eliminating the need to purchase or manage separate data plans or worry about throttling or deprioritization.

Auto Carrier Selection

Tier One Surveillance units transmit data over any major cellular provider, automatically selecting the strongest signal and switching when a better connection is available.

05 Artificial Intelligence

Innovative Deterrents

Tier One Surveillance leads with AI-generated audio talk-downs that automatically identify and address suspicious individuals based on their attire and actions.

Escalating Response

Our AI recognizes various objects and behaviors, triggering a sequence of automated audio and visual actions to deter potential threats.

Smart Alerting

Our system prioritizes detection events, identifying those requiring human intervention, reducing alerts and highlighting critical incidents for your attention.

Tire One Package

ALL-INCLUSIVE PROTECTION:

- 24/7 Live Monitoring & Dispatch center
- Police-Backed Response
- License Plate Reader System
- HD Night Vision Cameras
- Motion detector system
- 2 way communication speakers and mics
- siren alarm system
- Solar + Battery Backup
- Setup & Maintenance Included

MADE IN THE USA
WITH DOMESTIC & FOREIGN PARTS
